Thought and the state of the st

B替L

To the right honorable the Lord WILUGHBY of Parham, President of the Antiquarian Society.

HE love I had for my own country, in my younger days, prompted me to vifit many parts of it; and to refuse great offers made me, to go into foreign and fashionable tours. fenfible, we abounded at home with extraordinary curiofities, and things remarkable, both in Art and Nature; as well as most valuable Antiquities in all kinds; most worthy of our regard: and which it most became us to take cognisance of.

These considerations might perhaps induce me to be too hafty, in publishing my juvenile work, in this kind of learning; Itinerarium Curiofum, with an hundred ingraved plates: chiefly with a view to point out a way and method of inquiry: and to render this study both

uleful and entertaining.

The more readily therefore, I can excuse myself, in regard to imperfections in that work, as I had not fight of our author's Treatise, Richard of Cirencester, at that time absolutely unknown.

Since then, I have had the good fortune to fave this most invaluable work of his, I could not refrain from A 2

con-

contributing somewhat, toward giving an account of it, and of its author. I gladly address it to your Lordship, who worthily preside over the Antiquarian Society. I am sensible, your Lordship is animated with a like spirit in favor of your country, and of your country Antiquities.

I propose therefore briefly to recite,

- I. What memoirs we can recover, concerning our author, and his writings.
- II. I shall give an account of the map prefixed to the present treatise, which I copied from that of our author; giving it the advantage of the present geographical direction. I shall exhibit an alphabetical index of all the places mentioned in it, with the modern names annexed.
- III. A transcript of his most curious *Itinerary*; with an alphabetical index, all along assigning the present names of the places, according to the best of my judgment. This is the last helpwe must expect, toward finding out the *Roman* names of places in *Brittain*.
- IV. I shall mention the occasion and manner of finding out, and saving the Manuscript.
- I. Let us inquire, who our Richard of Cirencester was. And it will be regular, to declare who he was not.

He has often been confounded with a Richard, a monk of Westminster, a writer who lived a good deal after our author. This later Richard was a Devonshire man, cited by Risdon, in his description of that county: by Antony Wood, from Pitse's Manuscript, p. 462: by Fuller, book I. in his worthies, p. 263: by Bale, V. 87: by bishop Tanner, who repeats this; all erroneously.

My learned friend, the reverend Mr. Widmore, librarian to Westminster-Abby, deserves public thanks, for his inquiries, which he made at my request. In perusing the Abby rolls diligently, he finds, that he was Richard, a monk of Westminster, admitted in 1450, a member of that religious foundation: that he continued there till 1472. The roll beyond that time is defective.

But our author, Richard of Cirencester's name, first appears on the Chamberlain's list of the monks of West-minster, by the name Circestre, in 1355, 30. E. III.

In 1387, he is witness in a parchment deed, by the

name of Richardo Cirencestre confrater.

1397, in the Chamberlain's list, mentioned again R. Cirencester.

1399, Ric. Cirencestre.

1400, he was in the Abby infirmary, and died, in that, or the next year. The place of his interment que-

stionless, is in the Abby cloisters.

What is more particularly to be remarked, is this. In the year 1391, 14 R. II. he obtain'd a license of the Abbot, to go to Rome. This, no doubt, he perform'd between that, and the year 1397.

Thus

Thus bishop Nicolson, in his English historical library, p. 65. "Nor have I any more to say, of Richard of

" Chichester (he means our Cirencester) than what John

" Pitts has told me, fol. 438, that he was a monk of

"Westminster, A. D. 1348, that he travelled to most of the libraries in England, and out of his collections

" thence, compiled a notable history of this kingdom,

" from the coming in of the Saxons, down to his own

" time.

" But it feems (fays the bishop) he treated too, of

" much higher times."

Hence we gather an exact idea of our author's genius, a lover of learning, a lover of his country; which he studied to adorn. We learn his indefatigable diligence, in search of what might contribute to its history. He travelled all over *England*, to study in the Monastic libraries: his eager thirst prompted him to visit *Rome*; and he probably spent some years there. But his chief attention was to the history of his own country.

It will give you pleasure to read the original License, still preserved in the archives of the Abby, as Mr. Wid-

more transcrib'd it, omitting the contractions.

Licentia Abbatis Westmonasterii concessa fratri Ricardo Circestre, de peregrinatione ad Curiam Romanam.

The Abbot here is William de Colcestre, created 1386.

---- de Litlyngton preceded him: in whose time our Richard was admitted into the Abby, above thirty years ago.

Observe

Observe we, in his Chorography of Brittain he is a little more particular upon Cirencester; as a genius is naturally inclined to show regard to the place of his nativity.

Et cui reliquæ (urbes) nomen, laudemque debent, Covinum; urbs perspicabilis: Opus, ut tradunt, Vespasi-

ani Ducis.

Again, we may believe, Richard was of a good family, and had a fortune of his own, to support the charge

of travelling.

Hence we need not wonder, to see the produce of his eager thirst in learning. He was not content to write the transactions in his own Convent, or of those of his own time, but penetrated far and deep in his researches. for we shall find that he wrote the English history to his own time: the Saxon history complete: above that, the Brittish history, from the time the Romans left us; and, to crown all, we learn from the present work now happily preserved, the completest account of the Roman state of Brittain, and of the most antient inhabitants thereof; and the geography thereof admirably depicted in a most excellent map.

Such was this truly great man, Richard of Cirencester! What was his family, name, and origin, we know not. but it was the fashion of the Ecclesiastics of those days, and so down to Henry the VIIIth's time, to take local names from the place of their nativity; probably as more honorable. for most of the names then, were what we call Sobriquess, travelling names. a custom learnt from the expeditions into the holy land: what we call

nick-names. for instance, some were taken from offices, as pope, bishop, priest, deacon. some from animals, as bull, doe, bog, some from birds, as bat, kite, peacock, some from fishes, as salmon, berring, pike, some diminutive names of mere contempt, as peasecod, scattergood, mist, farthing. and the very samily-royal, the celebrated Plantaginet, means no more than broomstick.

But to leave this: we will recite, what we find of our author's works.

Thus Gerard John Vossius, de historicis Latinis, L. III. quarto, p. 532, englished. "About the year 1340, lived "Richard of Cirencester, an Englishman, monk of West-"minster, Benedictine. he used much industry in compiling the history of the Anglosaxons, in five books of Chronica. that work begins from the arrival of "Hengist the Saxon into Brittain, A. D. 448. thence, through a series of nine centuries, he ends at the year 1348, 32 E. III. and this work is divided into two. the first part begins,

Post primum Insulæ Britanniæ regem, &c. this is called by the author Speculum bistoriale, and contains

four books.

The other part is called Anglofaxonum Chronicon, L. V. is a continuation of the former part, Prudentiæ Veterum mos inolevit --- it was John Stows, says a manuscript note of Joscelin, in a manuscript in the Cotton library, Nero C. iii. a manuscript of both parts is found in the public library, Cambridge, among the manuscripts, fol. contains pages

pages 516, and four books. ends in 1066. (248.) in the catalogue of manuscripts mentioned p. 168, N° 2304. (124) it begins,

Brittannia insularum optima, &c. in the end (says Dr. James, librarian in A. D. 1600.) are these words.

Reges vero Saxonum Gulielmo Malmsburiensi et Henrico Huntendoniensi permitto: quos de regibus Britonum tacere jubeo &c.

Vossius says, there is in Bennet-College library, Cambridge, a manuscript epitome Chronicorum, which acknowledges our Richard for its author, in the title.

There is in the Arundel library of the Royal Society, among the manuscripts, p. 137, mention'd this. Britanum, Anglorum et Saxonum bistoria, to the reign of Hen. HI. said to be of this author.

Dr. Stanley, in his catalogue of the manuscripts in Bennet-College library aforesaid, p. 22. G. VIII. mentions this. Ricardi Gicestrii Speculum bistoriale, vel Anglosaxonum Chronicon, ab anno 449. ad H. III.

In the printed catalogue of manuscripts, p. 134, No. 1343. (66) Epitome Chronicorum Angliæ, L. 1, 2, Epitome Chronicorum Ric. Cic. Monachi Westmonasterii.

There is a work of our Richard's in the Lambeth library, among the Wharton manuscripts, L. p. 59. and the late Dr. Richard Rawlinson bought a manuscript of his, at Sir Joseph Jekyl's sale; which is now at Oxford.

Our author was not eminent solely in this kind of learning: but we find likewise the traces of other works of his, in his clerical character. Thus in a volume of St. Jerom's ad Eugenium, 19. 9. a manuscript in Bennet College

College library, is mention of Tractatus mag. magistri Ricardi Cirencestre, super symbolum majus et minus.

There is likewise in the library of Peterburgh, T. IV. a work of his, de Officiis Ecclesiasticis, L. VII. begins Officium ut --- This is mentioned by William Wydeford, and attributed to our Richard, in his determination against the trialogue of Wicliss, artic. 1. fol. 96. likewise by Richard Wych, who says, he flourished A. D. 1348.

Thus much we have to fay concerning our author's life and works. but let us reflect on what Dr. Nicolfon fays, in reciting what he had wrote of the Saxon history, adding, but it feems, he treated too of much higher times. here he must at least mean his Brittish history: or that from the time of the Romans. and perhaps that description of Roman Brittain, which we are now treating of. but what reasons were suggested to him about it, we cannot guess. and in our manuscript we observe it begins with p. xxii. as appears from a scrip I desired my friend Bertram to send me, of the manner of the writing. therefore some other work of our Richard's was probably contained in those 22 pages.

However these matters may have been, we must justly admire our author's great capacity, in compiling the history of his country from first to last; as far as he could gather it, from all the materials then to be found; in all the considerable libraries in *England*; and what he could likewise find to his purpose, in foreign parts. whether he found our map and manuscript in our monastic libraries at home; or in the *Vatican*, or elsewhere abroad, we cannot determine. he himself gives us no other light

in the case, than that it was compiled from memoirs a quodam Duce Romano consignatis, et posteritati relictis, which I am persuaded is no other than Agricola, under Domitian.

But above all, we have reason to congratulate ourselves, that the present work of his is happily rescu'd from oblivion, and most likely from an absolute destruction.

I shall now concisely recite the history of its discovery.

In the summer of 1747, June 11, whilst I lived at Stamford, I receiv'd a letter from Charles Julius Bertram, professor of the English tongue in the Royal marine Academy of Copenhagen, a person unknown to me. The letter was polite, full of compliments, as usual with foreigners, expressing much candor and respect to me; being only acquainted with some works of mine published. the letter was dated the year before: for all that time he hesitated in sending it.

Soon after my receiving it, I sent a civil answer: which produced another letter, with a prolix and elaborate latin epistle inclos'd, from the samous Mr. Gramm, privy-counsellor, and chief librarian to his Danish Majesty: a learned gentleman, who had been in England, and visited our universities. (Mr. Martin Folkes remembered him.) he was Mr. Bertram's great friend and patron.

dence between us. among other matters, Mr. Bertram mentioned a manuscript in a friend's hands, of Richard

of Westminster, being a history of Roman Brittain, which he thought a great curiosity: and an antient map of the island annex'd.

In november, that year, the Duke of Montagu, who was pleas'd to have a favor for me, drew me from a beloved retirement, where I proposed to spend the remainder of my life: therefore wonder'd the more, how Mr. Bertram sound me out. nor was I sollicitous about Richard of Westminster, as he then called him, till I was presented to St. George's church, Queen-Square. when I became fix'd in London, I thought it proper to cultivate my Copenhagen correspondence, and I received another latin letter from Mr. Gramm; and soon after an account of his death, and a print of him in profile.

I now began to think of the manuscript, and desired some little extract from it; then, an imitation of the hand-writing, which I shewed to my late friend Mr. Castley, keeper in the Cotton library, who immediately pro-

nounced it to be 400 years old.

time

I press'd Mr. Bertram to get the manuscript into his hands, if possible. which at length, with some difficulty, he accomplished: and on my sollicitation, sent to me in letters, a transcript of the whole; and at last a copy of the map: he having an excellent hand in drawing.

Upon perusal, I seriously sollicited him to print it, as the greatest treasure we now can boast of, in this kind of learning. in the mean time, I have here extracted some account of the Treatise, for your present entertainment: as I gave it to Dr. Mead, and to my very worthy friend Mr. Gray of Colchester, some time past, at their request.

Ricardi

Ricardi monachi Westmoniasteriensis commentariolum geographicum, de situ Brittanniæ, et stationum quas in ea insula Romani ædificaverunt.

Cap. I. Of the name and fituation of the island.

Cap. II. Of the measure. he quotes Virgil, Agrippa, Marcianus, Livy, Fabius Rusticus, Tacitus, Ptolomy,

Cæfar, Mela, Bede.

Cap. III. Of the inhabitants; their origin; he mentions reports of Hercules coming hither. of their manners: chiefly from Cæfar's Commentaries. of the military of the Britons; chiefly from Cæfar's Commentaries.

Cap. IV. Of the Druids authority and religion. in time of invasion all the princes chose a Dictator to com-

mand: chiefly from Cæfar.

Cap. V. Of the fertility of Brittain. its metals, &c.

Cap. VI. Of the division of the island into seven provinces. Britannia prima, secunda, Flavia, Maxima, Valentia, and Vespasiana. these were all under the Roman power. Caledonia is additional to the former, being the northwest part of Scotland, the highlands, beyond Inverness. we never had a true notion of the division of these provinces before: nor that the Romans possessed all the country to Inverness.

This chapter is very long: but as to the matter of it, 'tis an invaluable curiofity, to the inquirers into Roman Brittain. he gives us an exact, and copious chorography of the whole island: its boundaries, rivers, mountains, promontories, roads, nations, cities, and towns, in the time time of the Romans. it is accompanied with an accurate

map of faciei Romanæ, as the author terms it.

He gives us more than a hundred names of cities, roads, people, and the like: which till now were absolutely unknown to us. the whole is wrote with great judgment, perspicuity, and conciseness, as by one that was altogether master of his subject.

We have reason to believe, he copied some memoirs

wrote even in Roman times.

He speaks of the warlike nation of the Senones who lived in Surrey. they, under the conduct of Brennus, passed into Gaul, and over the Alpes, and beseig'd Rome. Romam fastu elatam, ista incursione vastatam solo: et Rempublicam Romanam funditus evertissent; ni eam Dii ipsi, more Nutricis, in sinu quasi gestare videbantur, &c.

Again, speaking of Bath, Thermæ, Aquæ solis quibus fontibus præsules erant Apollinis et Minervæ Nu-

mina.

Our author mentions no less than thirty-eight Roman stations, beyond the farthest vallum of Antoninus: and in England innumerable cities, towns, roads, &c. altogether new to us. such as Forum Diana, a city of the Cassi: Cantiopolis: Colonia gemina Martia: Theodosia: Victoria: Isinnis and Argolicum, cities in Lincolnshire: ad selinam: in medio: ad aquas: ad alone: statio Trajectus: ad vigesimum sc. lapidem: Bibracte, a city not far from London: ad lapidem: ad decimum: and very many more.

He mentions Via julia: a triumphal arch in Camulodunum: rivers, promontories, woods, mountains, lakes, bays, bays, ports, founders of cities; things and matters not named before, in any monuments come to our hands.

In Cornwall he speaks of Herculis columna, and infula Herculea. he remarks, the country of Cornwall abounding with metals, was sormerly frequented by the Phænicians and Greeks: who setched tyn from thence. and that the local names there, retain a Phænician and Greek turn.

De Caledonia. he describes this highland part of Brittain very particularly. their towns, mountains, promontories, &c. he speaks of the report of Ulysses coming thither, tost by tempests; and sacrificing on the shore. this is mention'd in Orpheus's Argonautics.

He speaks too of altars on the sea-shore, beyond Inverness, set up by the Romans: as marks and bounds of

their dominion.

Till now, Edenburgh had the honor of being thought the Pterooton or castra alata of the Romans; but our author removes it, far away to the river Varar in Scotland.

In Caledonia, tho' never conquer'd by the Romans, he gives us many names of people and towns.

Cap. VII. Itinerarium Brittaniarum omnium. our author had been upbraided, particularly by an eminent prelate, for turning his head this way, and spending his time in studies of this kind: which he here apologizes for. he shows the use of these studies, and the certainty of things he recounts.

" As to the certainty, fays he, of the names of people " and towns transmitted to us, we can no more doubt

" of them, than of the being of other antient nations,

" fuch as the Affyrians, Parthians, Sarmatians, Celtibe-

" rians, &c. of the names of Judea, Italy, Gaul,

" Brittain, London, and the like, which remain to this

" day, the same as formerly: monuments of the truth

" of old hiftory.

" As to the use, says he, we learn hence, the veracity " of the holy Scriptures: that all mankind fprung from " one root, not out of the earth as mushrooms. ' that a

" variety must be sought for in all studies.

" Particularly, this study gives us a noble instance of

the efficacy of the preaching of the Gospel. which with amazing celerity quite beat down Paganism, thro'

" this country, he is describing, as well as through the

" whole world.

" Another use of the study, is assisting us, in forming " true schemes of chronology.

"Then to the point, he acquaints us; he drew much

" of his materials ex fragmentis quibusdam a Duce quo-" dam Romano confignatis, et posteritati relictis, sequens

" collectum est Itinerarium. additis ex Ptolomeo et aliunde

" nonnullis.

He fays, there were ninety-two eminent cities in Brittain. thirty-three more famous than the rest. nine colonies of the Roman soldiers. ten cities of Latio jure domate. twelve Stipendiarie.

All these he recites particularly.

#### Diaphragmata or Iters.

He gives us the whole length and breadth of the island in miles. and then presents us with no less than nineteen *Iters*, or journies, in all manner of directions, quite across the island; the names of places and distances between: in the manner of that celebrated antique mo-

nument, called Antininus's Itinerary.

Very many of the names of places here, are intirely new to us: and as to the whole, though 'tis unavoidable, that they must in some journeys coincide with Antoninus's Itinerary; yet it is not in the least copied from thence. nay, our author never saw that monument. On the contrary, his Iter's are all distinct things; more correct and particular: and much better conducted than the others, and likewise fuller. they exceedingly assist us in correcting that work, on which the learned have from time to time, bestowed so much pains.

'Tis very obvious, that this must be of an extraordinary use and certainty, in fixing places, and their names in our *Brittania Romana*: which hitherto, for the most part, was done by guess-work, and etymology, and cri-

ticism.

will.

Cap. VIII. De insulis Brittanicis.

He begins with *Ireland*. and besides a map of it, along with that of *Brittain*, he gives an accurate description of the country, people, rivers, promontories, divisions, manners, mensuration: the fertility of the land, origin of the inhabitants, &c.

A very exact chorography of the nations and cities. Then of the other islands, Hebudes, Orcades, Thule, Wyght, and many more.

#### Liber II.

The chronological part of the work: which does not appear to have been taken from other authors now known. it chiefly handles the chronology of *Brittain*, and its hiftory: in matters not mention'd in other chronologies.

All the imperial expeditions hither, those of legates, proprætors, in their successive order: the taking of particular cities: the moving off of British people into Ireland: the building of the walls: the Romans abandoning Vespasiana province. the persecutions of the christians.

The paffage of the Scots from Ireland.

I need add no more, than if Camden and Burton, Gale and Horsley, had had Richard of Cirencester's work, there had been nothing left for others to do in this argument.

A very lively proof of the Romans conquering Scotland by Agricola, in Martial's Epigram,

Nuda Caledonio dum pectora præbuit Urso Non ficta pendens in cruce Laureolus.

Domitian, was extravagantly fond of exhibitions in the Amphitheater. Martial's I. Lib. intirely taken up therewith. nothing more engaging the emperor's vanity, than

for Agricola to fend him some bears from Scotland, for his shows.

Cap. II. An *Elenchus* of the *Roman* emperors and legates commanding in *Brittain*. the end is wanting.

## HING YOU DESIGNATION OF THE WAR WAS A STATE OF THE WAR AND THE WAR

On the MAP of

#### BRITTANIA ROMANA

O F

### RICHARD of Cirencester.

A. D. 1338.

Read at the ANTIQUARIAN SOCIETY, April 8, 1756.

A T first sight, this map appears very extraordinary, but when I came to compare it with those of Brittain, in Ptolomy, and other old geographers, I was much surprized to find how far it exceeds them. that in the oldest editions of Ptolomy is very mean, and especially erroneous, in turning all the major part of Scotland toward the east, instead of the north. printed at Ulm, 1482.

I have Schottus's edition at Argenson, 1513, with Mirandula's translation.

Alfo

Also another edition, 1540. at Basil. by Munster. but the map of Brittain and Ireland, in all, poor, and

jejune.

The description in Ptolomy is composed from two separate pieces; one a map of all the country north of Coria, or of the Prætentura in Scotland, which Agricola made: this I say, when they came to join it to the map of the rest of the island, they placed it eastward, instead of northward. and from this erroneous map, Ptolomy composed his description of Brittain. this map in other respects is very empty and incorrect. our author himself finds fault with it.

Mercator afterwards made his map for the next edition of Ptolomy, somewhat improv'd; but the northern part, or that of Scotland, still aukwardly bent toward the east.

Consequent to this, Ortelius his map is much improv'd; the northern part plac'd properly. yet in an unfeemly manner, as well as out of the rules of geography, he turns the western side of Brittain and Ireland upward in the plan, instead of the northern; agreeable to our present geographical charts.

Next follows our Richard of Cirencester's map, which exceeds them all, beyond compare. and the more we consider it, the more we approve. we easily discern, how far it is preferr'd to the Brittania Romana of the excellent Mr. Camden; whose judgment and diligence

we have reason to admire.

Richard's map is only equall'd by his written description, or chorography of Brittain. but he turn'd his map

map with the east-side uppermost, instead of the north. I have therefore, to give it its proper beauty in that respect, copied it according to modern geography, and in a somewhat larger scale.

There are in Brittain, says our author, cities of greater eminence XCII. of greatest XXXIII. I give the mo-

dern names.

This is a most curious catalogue of matters hitherto we were ignorant of. what Brittish cities were municipia, what Roman colonies, what free of Rome, what stipendiary. colonies liv'd under the Roman laws, municipia under their own.

Ninnius and Gildas name twenty-eight most famous Roman cities in Brittain, which the excellent archbishop Usher has commented upon. but the catalogue is quite different from ours. yet therein our author is confirm'd

in calling Verulam a Municipium. in Ninnius 'tis call'd

Caer Municip.

From ours we learn, in the early time of the empire, where the Roman legions were quarter'd. the legio gemina Martia victrix was the XIVth, here said to be at Camulodunum, Colchester; it was left here in Claudius's time. this legion vanquished Boadicia: was called out of Brittain early by Vespasian. here then we see our author's manuscript was prior to that time, viz. A. D. 70. I mean that from whence he extracted his work; the original manuscript. for we are to understand of it, as we do of that called Antonini Itinerarium, that it was a parchment roll made for the use of the emperor and his generals: which being transmitted down from one general to another, and frequently copied and tranfcribed, received from time to time feveral additions and interpolations of cities new built; and likewise others struck out, which were then in ruins.

The legio Claudia, quarter'd at Gloucester, was the VIIth Aug. this legion came over into Brittain with Julius Caesar, he calls it veterrima legio. it was named Claudia from the emperor; and called pia sidelis, by the Roman Senate. hence Gloucester was called Claudio cestria, from its residence here: and that it resided here, we learn from our author, who says he has it from writers of most antient Roman times. it remain'd here in Carausus's time.

The legio Gretica, quarter'd at Westchester, was the XX. V. V. they were in Brittain in Nerd's time: settled here by Agricola, A. D. 84, from our author only, we learn

learn this title of Cretica: as having been originally le-

vied in Crete. this was here in Caraufius's time.

Legio II. Aug. quarter'd at Caerleon in Wales, came into Brittain in the reign of Claudius, under the command of Vespasian. this legion was station'd at Canterbury in some later times, according to our author, C. VI. whence we gather, he compil'd his work out of old writers of different ages.

The legio VI. came into Brittain with Hadrian, settled at York; by Mr. Gale thought to be called Gordiana. York was made a colony of that legion. Antoninus Pius made it a municipium: and continued this legion there, it was concerned in persecting the Carsdike navigation to

Peterborough.

These legions are all mention'd in our author. before the time that Vespasian was emperor, Josephus relates, Bell. jud. II. 16. that king Agrippa, in his speech to the Jews, in Nero's time, and before that emperor called the XIVth legion from Brittain, speaks of sour legions then in Brittain.

I have this further to add, in relation to our map; when I began to confider it with that attention which it deserves, I was a little surprized, to see the river Trent, instead of falling northward into the Humber, to be carried eastward thro Lincolnshire, into the East-sea.

I presently suspected, this was owing to the artificial cut of the Romans, called Fossdike, part of the Carsdike; which Fossdike is drawn from Torksey at the Trent, to Lincoln; there it meets the river Witham coming from the south, and proceeds eastward toward Boston.

D

Ever

Ever fince I was capable of observation, I often took notice, that the whole flat, or senny country of Lincoln-shire, has a gentle declivity, or natural descent eastward. this is owing not only to the sea lying that way, but is the case of all levels in the whole globe. the cause must be afferted to be the earth's rotation upon its axis. which observation I printed long since, in my Itinerarium Curios.

Tis a principle in nature, that when a globe is turn'd on its axis, the matter on the surface slies the contrary way to its motion. the philosophers call this improperly a conatus recedendi ab axe motus. 'tis not owing to an endeavour of matter to fly the contrary way, but to the innate inactivity of matter that resists the motion; does

not readily follow it.

But 'tis evident from hence, that the earth receiving its motion before the surface was perfectly consolidated, the moistish matter would be left westward, as far as it could be, and produce an extended and gentle declivity on the east; and at the same time, by stiffening, would render

the west side of all hills steep.

This is a fact throughout the whole globe. hence it is, that all plains and levels have naturally their descent towards the east. and hence it is, that the river of Witham, from Grantham side, running northward to Lincoln, readily takes its course thence eastward, to meet the ocean over the senny level.

The Romans, when they made the artificial canal, the Carsdike, from Peterborough along the edge of the Lincolnshire fens, they introduced it into the river Witham,

three

three miles below Lincoln. the purpose of this artificial cut was, to convey corn in boats, from the southern parts of England, to the northern Prætentura's in Scotland; for maintenance of the forces kept there. therefore, the canal entering the Witham passed through Lincoln, and then was continued by another artificial cut called the Fossdike, from Lincoln to Torksey, where it enters the Trent, in order to go down the stream to the Humber. from thence the sleet of corn-boats passed up the river Ouse to York, by force of the tide. for so high will the tide carry them: which was the reason of building the city there.

After this Fossdike, between the Trent and Witham rivers, was made by the Romans, 'tis easy to imagine, that the extensive river of Trent, which runs altogether northwards, would very readily, upon great floods, discharge part thereof into the Fossdike; for there is a descent that way, as being to the east. and this might be the occafion of the geography in our map, mistaking the Fossdike and the continuation of the Witham, for that of the

Trent.

The river Witham, from Lincoln, goes south-east into the sea, by Boston. and it seems to me, that in very early times, it might (at least in great floods) have another channel running over the East-sen (as called) along that natural declivity full east, into the sea, as in the map of Richard of Cirencester.

This channel might pass out of the present river of Witham a little below Coningsby, where the river Bane falls into it, at Dockdike and Youldale, by the water

of Hobridge, north of Hundle-house; so running below Middleholm to Blacksike, it took the present division between the two Wapontakes, all along the southsides of the deeps of the East-sen: and so by Blackgote to Wain-

fleet, the VAINONA of the Romans.

My friend, John Warburton, Esq; Somerset herald, has some manuscripts of our Lincolnshire antiquary, some years ago, Mr. De la Pryme, who was persectly acquainted with that part of Lincolnshire, and therein discovers some suspicions of the Trent running toward Lincoln in antient days. but I think, all we can certainly conclude from our map is the extreme antiquity of it. as the Carsaike must have been projected and done by Agricola, on his conquest of Scotland, we may reasonably judge this to be in the main his map, i. e. copied, from his, though with some additions by our author.

This confideration, duly attended to, shows the antiquity of the Fosdike, and Carsdike, and of our map.

We are told in the history of Carausius, that he repair'd the Pratentura made in Scotland by Agricola, and added seven forts to it. a wise, and politic prince, knew the necessity of it. and consequently inser we, that he as surely repair'd the Carsdike navigation, to supply the soldiers with corn, in that northern situation. and I have several reasons to induce me to conclude, he not only did so, but carried it surther southward than before, viz. from Peterborough quite to Cambridge; some of which reasons I shall recite in the history of that hero. at present I shall only hint, that his name has ever been affixed to this samous canal, which has

never been regarded by writers. 'tis of utmost importance in the knowledge of Roman antiquity. and 'tis an affair of such public emolument, as not to be unworthy of the notice of the Legislature; where an inland water-carriage is made, for 200 miles in length, from Cambridge to Boroughbridge.

The Roman provinces, as we find 'em in our map, are these. Maxima Cæsariensis, or Britannia superior, chiefly the country of the Brigantes, conquered by Cerealis, and so nam'd by him, in the beginning of Vespa-

fian's reign.

Valentia, all that country comprehended between the two Pratentura's.

Britannia prima or inferior, that part of the island fouth of the Thames.

Britannia secunda, being Wales.

Flavia Cæsariensis, that part between the Humber, and the Thames; denominated from the samily name of Vespasian.

Vespasiana, that part of Scotland between the Varar Æstuary, or highland boundary, and the northern Præ-

tentura.

Lastly, Caledonia properly, or the Highlands, which the Romans never conquered. and that part called Vespasiana, after Agricola return'd, was neglected by Domitian, and recover'd by the Scots; at least to the first Prætentura. and 'tis from Richard of Cirencester alone, that we have an Itinerary of it from the Vararis Æstuary; on which is the last Roman station, called Alata Castra, now Inverness.

I shall next recite all the places, rivers, mountains, &c. specified in our map, the provinces they are in, and that in alphabetical order; together with the modern names of each, according to the best of my knowledge; whereby the value and excellence of our manufcript will more easily appear: seeing so many of them we were hitherto unacquainted withal; which I shall mark particularly thus \*, as also those wherein we are able to correct former writers.

Thus I have recounted the names of places contain'd in this excellent map, to the number of 250: whereof 100, mark'd in this catalogue thus \*, are wholly new, or ill-plac'd by former writers. the reader vers'd in these kind of inquiries, will find no small number of them; to his judgment I leave them; as to me, the finding fault with others endeavours, is very disagreeable. this I may say, it sets us right in abundance, wherein before, we had no guide but conjecture, from similitude of names. as for instance, Uxella plac'd in some great authors at Lestwiell, Cornwal; is in Somersetshire, viz. at Barton, where the Roman road called Foss crosses the river, a little north of Ilchester. many more might be specified, where only a map can properly direct us.

I must take notice of another use in our map. in the province of Britannia Prima are two Venta's, but till now, we could not ascertain them both. the map shows

us, one is Wimborn minster, the other Wintchester. the former is on the river Alauna, seen plainly in Blansord, being the ford over the Alauna; Llaunsord, in the Belgic pronunciation: called now Allen river. our author calls Canterbury, Cantiopolis, the before we knew no other name it had than Durovernum. but the modern name of Canterbury seems deriv'd from the former. and the termination savors our author's observation in another part of his history, of remains of Greek traders preserv'd in some places, of which several more instances may be given.

I extend my inquiries here on Richard of Cirencester's map, no further than our island of Britain; leaving that of Ireland, to those that have proper opportunities.

Nor shall I pretend to assign places in Scotland, any farther than the map directs me; but leave them too to those that have proper opportunities of inquiry, in that kingdom.

Let us now proceed to his *Itinerary*: a truly invaluable monument! from these two we may hope to obtain a complete knowledge of *Roman Britain*.

## CAPVT VII.

Our author calls these, Iters of his Diaphragmata; from

from their similitude to the animal midriff, passing thro'

the body from fide to fide.

Rhutupis colonia, Sandwich, Richborough and Stonar castle, Kent, is the sirst city, says our author, in the island of Brittain, towards Gaul; situate among the Cantii, opposite to Gessoriagum, the port of Bononia, Boloign. hence is the most commodious passage of coccustadia, or, as others will have it, xLVI miles.

From that city Rhutupium, says he, is drawn the Roman way call'd Guithlin street, quite to Segontium, Caernarvon, thro' the space of ccexxiv miles, or thereabouts.

Were I to recite all I have written upon this work, by way of comment, it would amount to a large volume. yet some few remarks I must make.

What all others call Durolenum, our author names Durosevum, which I affix to Sittingburn, favoring this

reading: the diffance conformable.

Sulloniacis, or rather Suellaniacis, has its name from Suellan, or Cassibelin, who fought Cæsar. I place it at Edgware, which has its name from the Agger, or high raised Roman way, Watling street. here was Cassibelin's usual residence. his Oppidum, or military town, which Cæsar storm'd, was at Watford.

Forum Diana, a new name, was crouded into the roll of the original Itinerary, where the intermediate distance x11 miles between St. Albans and Dunstable remained unalter'd. therefore the transcriber repeated the

fame distance erroneously.

I doubt not, the place is what we now call Market street, a little on this side Dunstable, upon the great road Watling street. here was a Fane, and Forum, or portico sacred to Diana; where a Panegyre, or Fair, as we call it, was annually celebrated to the honor of the goddess, by the lovers of hunting; on the great sestival sacred to her when stags were sacrificed. this was

upon august 13, the hunter's day, in the Roman kalendar.

I have no need to be asham'd in acknowledging an erorr incurr'd in my juvenile travels, when we knew nothing of this work of our author's. for now I apprehend Durocobrivis is another name of a town near this place, the modern name of Redburn proves it, which means the same as Durocobrivis, the passage over the Redwater brook.

Rotten row, Rowend, Flamsted by Forum Diana, names importing high antiquity. Rotten row just by Bremenium, Ruchester. again at Dorchester, Oxfordshire. they relate to Panegyres or Fairs.

Manduessedum, Mancester, on each side the Watling

freet, was walled about.

The Vestigia of Benonis are at Claybrook.

Thus we have the whole length of the Watling street, from Dover to Caernarvon.

Lindum colonia, Lincoln.

Iter VI. of Antoninus, a Londinio Lindum, goes quite a different way from this: the one to the right, the other to the left of the straitest way, the Hermen street. instead of our Durnomagus on the northern, he mentions Durobrivis, Chesterton, on the southern bank, of the r. Nen, a walled city: a bridge over the river, built since the time of our Itinerary. and also

From Camboritum to Durosiponte, in this Iter of ours, and Vth of Antoninus, I collect, the Roman city of Cambridge, Granta, was not then in being.

I suppose, it was sounded by Carausius, when he carried the Carsdike from Peterborough to Cambridge, and made the road over Gogmagog bill, from Durosiponte, Godman-chester, to Camulodunum colonia, Colchester; for all these Itineraries were made before Carausius's time.

Thus we have finished this famous Itinerary, much more large than that of Antoninus, contains many names of places not compriz'd therein, and ascertains much more of the geography of Roman Brittain, of England, and Scotland. 'tis useful to recite an alphabetical index of it, marking those places with an asterisc, not mentioned by former writers, or not rightly assign'd to the modern names and places: and still leaving many to the diligence and acumen of suture writers.

# IV.

# Observations on the Itinerary.

In my former papers, I discoursed to the Society, first, in rehearsal of the Memoirs we can recover, concerning Richard of Cirencester, and of his writings.

I gave an account of the most excellent map of Roman Brittain, presixt to the Treatise we are upon; this not only enables us to fix many places and stations, which before now, we could do only by mere conjecture, and etymology of names, and the like: but further,

further, it gives us 100 places not hitherto known, fo much as in name.

Come we now to treat on the Itinerary, compriz'd in 18 Iters, which traverse the island of Brittain all manner of ways, in the nature of that we call Antoninus's Itinerary; with the intermediate miles between every station: to which I have assign'd the respective modern names of the places, to the best of my knowledge.

This Itinerary of our author is far more copious than that of Antoninus: especially it takes in the whole kingdom of Scotland, that country reduced by the valiant Agricola, and called by him Vespasiana; when made a province, in honor to the reigning emperor's father. it took him up seven whole years to complete this great conquest. and one of our Iters extends from Alata ca-

fra, Inverness, to the lands end in Cornwal.

From due consideration, we have reason to believe, this Itinerary of our author's, as to the original plan, is no other than that of Agricola. after he was recalled by Domitian, about A. D. 85. to Hadrian's time, Brittain was neglected, Agricola's cities in Scotland overthrown, his castles dismantled. so that Tacitus well says, Perdomita Britannia et statim amissa. he means only Scotland subdued by Agricola. for sour legions remained in that part we call England, to keep it in subjection till Hadrian came.

To our Itinerary alone, and the map, are we indebted for the knowledge of the stations in *Scotland*. so that we must conclude, he had sight of manuscripts and rolls, which were written in that time; whether in the libraries at Rome, or in the monastic libraries of Brittain, we know not. but from the same libraries Antoninus's Itinerary, and the like monuments of learned antiquity were taken.

It would feem that Wittichind, the Saxon author, had feen fuch like works, as our Richard perus'd: he writes, that Brittain was divided into provinces by Vespasian.

Richard writes expressly, that he copied some papers, transmitted to posterity by a Roman General, who probably was Agricola. he had some informations from certain religious of his order, who had been in Scotland.

He learnt what he writes on Caledonia, from Brittish merchants. Again, speaking of Glevum, Gloucester, he says, 'tis a Roman colony, constituted by Claudius. ut scriptores de istis temporibus affirmant. so that he omitted no kind of means to acquire knowledge of the Brittish geography.

In medio, ad fines, ad Itunam flu. ad montem Grampium, Herirus, mons, Alpes Pennini, ad Pontem, ad murum, ad vallum. A very great number of these, and the like, being recited, intimate the high antiquity of the Itinerary: that the roads were generally made, or marked out; but towns, cities, castles, not then built: only some inns, for present conveniency: especially we see this in Scotland, a good way on the sea-coast northerly, and remarkably in the IXth Iter: ad Tavum, ad Afscam, ad Tinam, ad Itunam, ad montem Grampium, ad Selinam; and in the map, these rivers are named, and the Grampian moun-

mountain, without a town's name annex'd; as then not fully built. and probably that country was left by the Romans, before the towns were built, the Romans having chiefly strong camps by the rivers. we may reasonably hence judge, the original itinerary and map, which our Richard copied, was constructed in Agricola's time: tho' afterward additions were made to it.

We see likewise this method of nomination, used in other more distant parts, as Herirus mons in Wales, Alpes pennini in the mountainous tract of Lancashire.

In Iter IV. Ad Tisam amnem, Ad Murum, Ad Alaunam flu. Ad Tuedam flu. Ad Vallum.

In Iter XI. Ad Alone, Ad Sabrinam, Tibia amnis,

Ad Vigefimum lapidem, &c.

In Iter XV. Ad Lapidem, Ad Decimum lapidem, where only mile stones are named. and the remains of this manner of denomination are left in the English names Stoneham, Stone, Stanefield, Stanwic, Stanton, and the like.

We learn to correct many words in our geography, which before were not truly wrote. for instance, Bannavenna, Towcester. sometimes Benavona, Bennaventa, which words have no meaning, is really Isannavaria, ill plac'd at Weedon, or rather Isantavaria: which words are easily deduced from the Brittish.

I judge it will be a matter useful to the studious in this kind of learning, to collect into one general index, all the names of places hitherto recited in the map, and Itinerary, with the annexed afterisk denoting those names

K

which

which are new, or better placed, than in former books, or of new denomination. to which we must add those recited in his VIth chapter of the Chorography of Brittain. this contains above 100 names not found in my friend Mr. Baxter's Glossarium Brittanicum: who has collected all the names we before knew; and this present must justly be esteemed the noblest monument of antient Brittain.

This is a collective index, much the largest extant, of all the places mention'd in the Map, in the Itinerary, in the Chorography, of Richard of Cirencester's Work. it contains in the whole 500 names of antiquity, whereof about 150 I have fign'd with an afterife, as wholly new, more correctly named, or placed, than in former writers on the subject. We must needs look on it as a great treasure in Roman Antiquities. I have assigned the modern names. 'Tis impossible I should be exact in all, either in England, or Wales, or Scotland. they must be left to the studious, who have proper skill and opportunities, to examine them: and make a just use of the great light here thrown on the face of our island, in the earliest times of the Romans. some I have purposely omitted, that the lovers of these antiquities may use like diligence to fill up those vacancies, as well as correct others, which future discoveries will enable them to do.

On the opposite page is a specimen of the writing of

the original manuscript, and explication thereof.
